

Travelers Rest Resort, Inc.

2011 Summer Updates June

The park is in full bloom photo by Randy Doell

It's June already and the summer will fly by very quickly. Contrary to popular belief, TR is always a great place to summer in. It's like having a private resort almost all to yourself.

We have about 80 to 90 residents that now stay here all year. When we first came to TR in 2002 there were only about 55 to 60 year round residents, so we continually grow.

If you have not a chance yet to explore our new web page, take a

few minutes and treat yourself to an exciting new face for TR at www.travelersrestresort.com it will take you to the site. The web page was designed and put together by Mr. Steve Smith 2544 who has built hundreds of web pages for customers both nationally and internationally.

Steve has done a great job with the web page and it remains a work in progress as we will be adding items as we get the site more and more fine tuned.

One example is the use of some people pictures. We have received communications stating that the people were not TR residents.

This is true. Stock pictures were used to get the site up and running. Any picture can be replaced at any time. However, due to current copy write and privacy statutes, we must obtain permission from individuals before we can insert them into the web site for the world to see.

Another area of the web site that is being currently worked on is a special portion exclusively for the TR stock holders and residents to access.

This area will be password accessible only to stock holders and residents and will contain information submitted by the board and any other type of communications that would be of special interest.

Suggestions have been presented to include surveys concerning particular issues, chat rooms for residents and a classified ad section and several other ideas that are being looked at.

This exclusive site is also a work in progress and will be adjusted and manipulated to fit the ever changing needs for information.

A special thanks to board member Dean Sarbaugh, his wife Stacy, and helper Frank McCafferty for taking on the job of under-pinning the corporate office.

This was a very well done job, looks great and will keep the animals out from under the office.

Under-pinning completed on the East side of the corporate office.

Thanks Dean, Stacy and Frank for all your hard work.

The towers for the new Wi-Fi system have been ordered. We will be using metal towers in lieu of wooded power poles for several reasons.

Firstly they are less expensive. Additionally, since all the utilities are underground, the big wooden power poles would look out of place strewn through the resort.

The metal towers have a better aesthetic appeal and we already have several metal towers in the resort which have been used for many years for our Ham operators and communications.

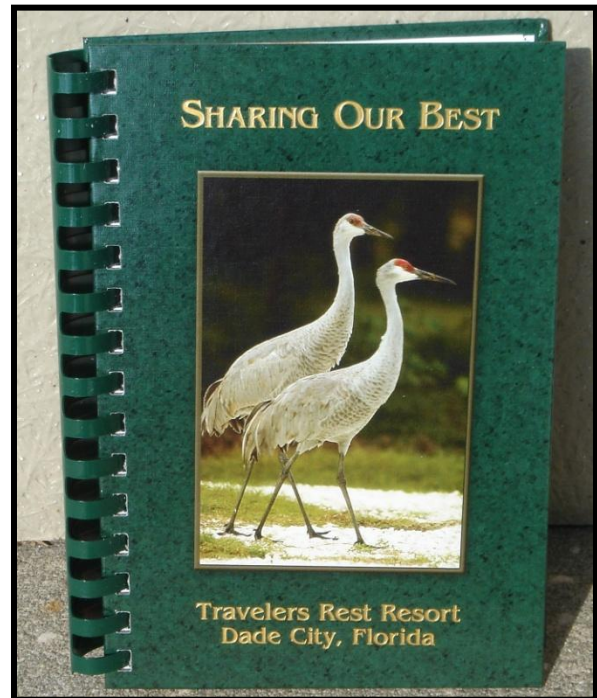

Another factor that was of consideration is when any maintenance or replacement of equipment becomes necessary, a technician can easily climb a metal tower. Conversely on a wooden poser pole, one must either use climbing spikes or use a bucket truck to access the equipment.

We still have a good supply of the reprints of the TR cookbook. This one has a ton of really great receipts in it.

We have tried many of them and each one is has just been wonderful. It's fun to get a chance to be exposed to the vast verity of favorite or old family receipts.

Anyone can pick one up in the office for \$12.00. We can also ship the book for an additional \$4.00.

If you are traveling, drive safe and enjoy your sojourns.

Randy
